

THERMOLAB INDUSTRIES (TLI)

PCR CABINET – UV STERILIZATION MODEL

Clean • Safe • Reliable PCR Workstation

PRODUCT OVERVIEW

The TLI PCR Cabinet is designed to provide a contamination-free environment for PCR preparation and sensitive molecular biology applications. It integrates UV sterilization, HEPA filtration, and controlled airflow to ensure maximum protection of samples.

TECHNICAL SPECIFICATIONS

PARAMETER	SPECIFICATION
MODEL	TLI-PCR-2026
CONSTRUCTION	Full Polycarbonate (All Sides)
FRONT DOOR	Hinged / Flap Transparent Door
ELECTRICAL SUPPLY	220V / 50 Hz
UV SYSTEM	Built-in UV Sterilization Lamp
FILTRATION	HEPA Filter
LIGHTING	LED
VENTILATION	Integrated Airflow System
TIMER	Digital Timer

KEY FEATURES

- UV Sterilization for effective decontamination
- HEPA filtration for clean airflow
- Durable polycarbonate enclosure
- User-friendly control panel
- Compact bench-top design

APPLICATIONS

- PCR Sample Preparation
- DNA / RNA Handling
- Molecular Biology Laboratories
- Pharmaceutical and Diagnostic Labs
